

**DELGAUDIO MAKES STERLING SAFER WITH COMPLETED SIDEWALKS**

Look out for new sidewalks coming to Sterling. Supervisor Delgaudio is pushing for the approval of four new sidewalks to fill in missing gaps around Sterling along:

1. Greenthorn Ave. at Sterling Blvd.
2. W Church St. between Magnolia Rd. and W Holly Ave.
3. Sugarland Rd. by Norwood Pl.
4. Woodson Dr. by Dranesville Rd.

Supervisor Delgaudio has worked tirelessly for years to bring critical infrastructure improvements to the Sterling community.

He commented, “People talk to me all the time about projects they would like to see in Sterling, like these sidewalks, and I listen to them. These are roads that people walk all the time, but it’s not safe to walk in the street. These sidewalks will help to make walking in Sterling safer and easier.”-TDR

# Claude Moore Park gets new paved trails

Claude Moore Park recently completed a \$1.3 million project to add more than a mile of new, paved pathway and other improvements to the park.

The new mile-long path runs across the park along Loudoun Park Ln., connecting the Victoria Station neighborhood on the west side with the Park View neighborhood at Juniper St. to the east. Another quarter-mile segment of dirt path was upgraded to a gravel path.

The park now features more than 12 miles of premier hiking and biking trails right here in Sterling.

Supervisor Delgaudio remarked, “These improvements have been years in the

making, but we have seen this important project through. These new trails will be a great asset to Loudoun and to Sterling. In addition to expanding the exercise and recreational opportunities of Sterling Americans, these paths have bridged an important missing link and now tie our Sterling community closer together. I am constantly working to add sidewalks and trails to make walking in Sterling easier and safer for the people of Sterling.”
